

AKHILESH MISHRA

SOFTWARE ENGINEER / FULL STACK ENGINEER

CONTACT

- +91 88580 45785
- makhileshkumar1@gmail.com
- LinkedIn
- GitHub

CORE SKILLS

- LANGUAGES**
Python, Java, JavaScript (ES6+), TypeScript, SQL, C++, HTML5, CSS3
- FRAMEWORKS**
Spring Boot, Django, FastAPI, Node.js, Express.js, React.js, Next.js, Redux
- DATA & MESSAGING**
MySQL, PostgreSQL, MongoDB, Redis, Apache Kafka, Mongoose, Hibernate, JPA

- DEVOPS & TOOLS**
Docker, Git, GitHub Actions, CI/CD, Postman, Linux, OpenCV, Pandas, Maven

EDUCATION

- B.Tech.**
Kanpur Institute of Technology
Kanpur, UP | 2019 - 2023

CERTIFICATIONS

- GeeksforGeeks MERN Stack Certification
- Coding Ninjas DBMS Certification
- Coding Ninjas DSA Certification
- IIT Kanpur Prutor Cyber Security Certification

PROFILE SUMMARY

Versatile Software Development Engineer with extensive experience building secure, scalable full-stack web applications and microservice architectures across multiple technology stacks (MERN, Java Full Stack, Python Full Stack). Expert in system design, API development, and database engineering. Proven success in re-architecting monolithic services into containerized microservices, building real-time telemetry pipelines via WebSockets, and optimizing transaction-heavy ledger platforms. Led development teams and streamlined DevOps workflows using Docker and CI/CD.

EXPERIENCE

- Software Development Engineer** - **CSC e-Governance Services India Ltd. (MeitY, Government of India)**
Ministry of Electronics & Information Technology, Govt. of India
12/2023 - PRESENT | New Delhi, India
 - Re-architected monolithic backend services to distributed microservices using **Spring Boot**, **FastAPI**, and **Node.js**, improving performance for **20 lakh+ users**.
 - Architected transactional endpoints for AEPS, MATM, and UPI platforms, managing **5 lakh+ daily transactions** with an **~80% success rate**.
 - Secured backend APIs utilizing **JWT Authentication** and **RBAC**, integrating device binding and OTP security, reducing unauthorized access attempts by 99.9%.
 - Architected and optimized databases using **MySQL**, **PostgreSQL**, and **MongoDB**, utilizing sharding and query tuning to reduce read/write latency by 45%.
 - Established event-driven communication using **Kafka**, **Celery**, and **Redis** cache, boosting message processing throughput by 35%.
 - Integrated transaction monitoring dashboards using **React.js**, **Redux**, and **WebSockets**, enabling real-time status updates under 500ms.

- Freelance Software Engineer** - **Workforce Telemetry & Operations**
Real-Time Telemetry & Geofencing Platform
06/2023 - 11/2023 | Remote, India
 - Created and developed a real-time workforce telemetry platform using React and FastAPI backend, serving **1,000+ active field agents**.
 - Built an interactive live map dashboard in **React** using Ant Design to display speeds and alerts, reducing UI load times by 30%.
 - Developed an asynchronous location ingestion pipeline utilizing **FastAPI**, **Celery**, and **Redis**, processing **10,000+ concurrent GPS pings with 99.9% uptime**.

SELECTED PROJECTS

- MERN FinTech & E-commerce Platform**
A collection of full-stack web applications featuring secure user authentication, interactive dashboards, and REST APIs built with React, Node, Express, and MongoDB.
STACK: React.js / Node.js / Express.js / MongoDB / JWT / Redux
- Facial Recognition Attendance System**
Engineered an automated student attendance tracking application integrating Python face detection algorithms (OpenCV/LBPH) with MySQL database.
STACK: Python / OpenCV / Tkinter / MySQL / Pandas
- Himalayan Edges Website Development**
Created an e-commerce platform using React.js and Django with PWA capabilities, hosted on AWS, increasing page speed by 30%.
STACK: React.js / Django / SQLite / AWS / PWA
- Traveling Portal & Landing Page**
A fully responsive, modern front-end landing page for a travel agency built with HTML, CSS, and Bootstrap layouts.
STACK: HTML5 / CSS3 / JavaScript / Bootstrap
- Persistent Task Management Dashboard**
Programmed a desktop utility for task planning, category filtering, and JSON data persistence, featuring clean MVC architecture patterns.
STACK: Python / Tkinter / JSON / MVC Patterns
- Real-Time Telemetry Geofencing Engine**
Built a real-time workforce geolocation tracking engine with asynchronous GPS coordinate logs, map visualizations, and alerts via WebSockets.

ACHIEVEMENTS

- Graduated with First Class Honors, maintaining top academic rank.
- Earned a 4-Star Gold Badge in SQL on HackerRank.
