CORE SKILLS

FRONTEND

React.js, Next.js, Redux Toolkit, React Query, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI

BACKEND & APIS

Node.js, Express.js, RESTful APIs, WebSockets, JWT authentication, RBAC, middleware design, API versioning

DATABASE & CACHING

MongoDB, Mongoose, aggregation pipelines, schema design, indexing, sharding, Redis

TOOLING & CLOUD

Git, GitHub, GitHub Actions, Docker, CI/CD pipelines, Jest, Postman, AWS S3

EDUCATION

B.Tech.

Kanpur Institute of Technology
Kanpur, UP | 2019 - 2023

CERTIFICATIONS

Advanced MERN Stack Developer
Certification
Data Structures & Algorithms Certification
Database Systems & SQL Certification
IIT Kanpur Cyber Security Certification

PROFILE SUMMARY

Software Development Engineer specializing in the MERN stack, building secure, high-throughput FinTech and transaction platforms. Deep expertise in React.js, Next.js, Redux Toolkit, Node.js, Express.js, and MongoDB. Scaled Node.js microservices to serve 2 million+ users and 500,000+ daily transactions, cut MongoDB response times by 40% through indexing and aggregation tuning, and delivered real-time monitoring dashboards over WebSockets. Ships containerized releases through Docker and GitHub Actions.

EXPERIENCE

Software Development Engineer - CSC e-Governance Services India Ltd. (MeitY, Government of India)

Ministry of Electronics & Information Technology, Govt. of India
12/2023 – PRESENT | New Delhi, India

- Re-architected monolithic e-governance portals into **Node.js** and **Express.js** microservices, improving fault isolation and deployment speed for **2 million+ active users**.
- Built real-time transaction monitoring and location tracking dashboards with **React.js**, **Redux Toolkit**, and **WebSockets**, surfacing **500,000+ daily transactions** with sub-second updates.
- Integrated third-party UPI and XML payment APIs through **Express.js** service controllers, adding retry and reconciliation handling that raised AEPS and MATM settlement reliability at peak load.
- Hardened authentication with **JWT** and **Redis**-backed sessions, layering device binding and OTP throttling to shut down credential-stuffing and replay attempts.
- Tuned **MongoDB** schemas with compound indexing, sharding, and **Mongoose** aggregation rewrites, cutting database response times by **40%**.
- Automated build, test, and container delivery with **Docker**, **GitHub Actions**, and **Git**, removing manual release steps from every deployment.

Freelance Software Engineer

Real-Time Telemetry & Geofencing Platform
06/2023 – 11/2023 | Remote, India

- Workforce Telemetry & Operations

- Designed and shipped a real-time workforce tracking platform on **React.js**, **Node.js**, **Express.js**, and **MongoDB**, serving **1,000+ active field agents**.
- Built an interactive map tracking interface in **React.js** with **Ant Design**, streaming live coordinates over WebSockets and cutting UI load times by **30%**.
- Managed client state and request caching with **Redux Toolkit** and **React Query**, eliminating **45%** of redundant API calls.

SELECTED PROJECTS

MERN FinTech & Commerce Suite

Full-stack applications with JWT-secured authentication, role-based admin dashboards, and versioned REST APIs built on React, Redux Toolkit, Express, and MongoDB.

STACK: React.js / Redux Toolkit / Node.js / Express.js / MongoDB / JWT

Himalayan Edges E-Commerce Platform

PWA-enabled storefront built on the MERN stack and deployed to AWS, lifting page-load speed and client usage by 30% at a 20% cart conversion rate.

STACK: React.js / Node.js / Express.js / MongoDB / PWA / AWS S3

Real-Time Geofencing & Telemetry Dashboard

Live workforce tracking dashboard streaming GPS coordinates and geofence alerts to a React map view over WebSockets, backed by an Express ingestion API and indexed MongoDB collections.

STACK: React.js / Node.js / Express.js / WebSockets / MongoDB

Role-Based Authentication & Admin Portal

Reusable Express authentication service with password hashing, JWT access and refresh token rotation, and RBAC middleware consumed by React protected routes.

STACK: Node.js / Express.js / MongoDB / JWT / React Router

ACHIEVEMENTS

- Graduated with First Class Honors, maintaining top academic rank.
- Earned a 4-Star Gold Badge in SQL on HackerRank.
