

AKHILESH MISHRA

PYTHON FULL STACK DEVELOPER

CONTACT

+91 88580 45785
makhileshkumar1@gmail.com
LinkedIn
GitHub

CORE SKILLS

BACKEND

Python, Django, FastAPI, Celery, Django REST Framework, SQLAlchemy (asyncio), Pandas

FRONTEND & APIS

React.js, JavaScript, HTML5, CSS3, Bootstrap, RESTful APIs, WebSockets, JWT Security

DATA & MESSAGING

PostgreSQL, MySQL, SQLite, Redis cache/broker, database schema design, query indexing

TOOLS & CLOUD

Git, GitHub, Docker, Postman, Linux environments, OpenCV, LBPH face recognition

EDUCATION

B.Tech.

Kanpur Institute of Technology
Kanpur, UP | 2019 - 2023

CERTIFICATIONS

GeeksforGeeks MERN Stack Certification
Coding Ninjas DBMS Certification
Coding Ninjas DSA Certification
IIT Kanpur Prutor Cyber Security Certification

PROFILE SUMMARY

Software Development Engineer specializing in Python Full Stack development, with a track record of building secure, scalable backend architectures and web systems. Expert in Python, Django, Django REST Framework (DRF), FastAPI, Celery, and database design in PostgreSQL/MySQL. Proven experience in migrating monoliths to async microservices, designing event-driven pipelines using Celery/Redis, and building real-time dashboards via WebSockets. Optimizes database queries and scales backend infrastructures using Docker.

EXPERIENCE

Software Development Engineer

- CSC e-Governance Services India Ltd. (MeitY, Government of India)

Ministry of Electronics & Information Technology, Govt. of India

12/2023 – PRESENT | New Delhi, India

- Re-architected monolithic web services into scalable, asynchronous **FastAPI** and **Django** microservices, improving reliability for **20 lakh+ users**.
- Designed and scaled transaction orchestration services for AEPS, MATM, and VATM platforms using Django REST Framework, handling **5 lakh+ daily transactions**.
- Implemented secure API authentication using **JWT** and role-based access control (**RBAC**), including OTP verification, reducing authentication latency by 50%.
- Developed an asynchronous task queuing pipeline using **Celery** and **Redis**, reducing processing bottlenecks by 35% under peak traffic.
- Tuned **PostgreSQL** and **MySQL** database schemas using indexing and query partitioning, lowering transaction query latency by 45%.
- Constructed real-time transaction tracking APIs utilizing **FastAPI WebSockets** to stream live status updates in under 500ms.

Freelance Software Engineer

- Workforce Telemetry & Operations

Real-Time Telemetry & Geofencing Platform

06/2023 – 11/2023 | Remote, India

- Developed a real-time workforce telemetry and geofencing system utilizing **FastAPI**, **SQLAlchemy** (asyncio), and **React.js**, serving **1,000+ active field agents**.
- Built an interactive live telemetry dashboard in **React** using Ant Design to visualize coordinates and speed, reducing UI load times by 30%.
- Implemented a high-performance, asynchronous ingestion API to capture GPS locations, processing **10,000+ concurrent GPS pings with 99.9% uptime**.

SELECTED PROJECTS

Facial Recognition Attendance Dashboard

Developed an automated student attendance tracking application in Python using OpenCV (Haarcascade & LBPH) and MySQL, with custom Excel reports via Pandas.

STACK: Python / OpenCV / Tkinter / MySQL / Pandas

Himalayan Edges Website Development

Created an e-commerce platform using Django and React.js with PWA features, hosted on AWS, boosting page speeds and usage by 30%.

STACK: Python / Django / React.js / SQLite / AWS / PWA

Persistent Task Management Dashboard

Programmed a desktop utility for task planning, category filtering, and JSON data persistence, featuring clean MVC architecture patterns.

STACK: Python / Tkinter / JSON / MVC Patterns

Traveling Portal & Landing Page

A fully responsive, modern front-end landing page for a travel agency designed with HTML, CSS, and Bootstrap layouts.

STACK: HTML5 / CSS3 / JavaScript / Bootstrap

ACHIEVEMENTS

- Graduated with First Class Honors, maintaining top academic rank.
- Earned a 4-Star Gold Badge in SQL on HackerRank.
