EXPERIENCE

Software Development Engineer | CSC e-Governance Services India Ltd. (MeitY, Government of India)

Ministry of Electronics & Information Technology, Govt. of India

12/2023 – PRESENT | New Delhi, India

- Re-architected monolithic web services into scalable, asynchronous **FastAPI** and **Django** microservices, improving reliability for **20 lakh+ users**.
- Designed and scaled transaction orchestration services for AEPS, MATM, and VATM platforms using Django REST Framework, handling **5 lakh+ daily transactions**.
- Implemented secure API authentication using **JWT** and role-based access control (**RBAC**), including OTP verification.
- Developed an asynchronous task queuing pipeline using **Celery** and **Redis** to handle high-volume wallet ledger records.
- Tuned **PostgreSQL** and **MySQL** database schemas using indexing and query partitioning, lowering transaction query latency.
- Constructed real-time transaction tracking APIs utilizing **FastAPI WebSockets** to stream live status updates.

Freelance Software Engineer | Workforce Telemetry & Operations

Real-Time Telemetry & Geofencing Platform

06/2023 – 11/2023 | Remote, India

- Developed a real-time workforce telemetry and geofencing system utilizing **FastAPI**, **SQLAlchemy** (asyncio), and **React.js**.
- Built an interactive live telemetry dashboard in **React** using Ant Design (antd) to visualize coordinates, speed, and geofences.
- Implemented a high-performance, asynchronous ingestion API to capture GPS locations (/api/v1/tracking/ingest) using **FastAPI**.
