

AKHILESH MISHRA

SOFTWARE ENGINEER / FULL STACK ENGINEER

CONTACT

+91 88580 45785
makhileshkumar1@gmail.com
LinkedIn
GitHub

CORE SKILLS

LANGUAGES

Python, Java, JavaScript (ES6+), TypeScript, SQL, C++, HTML5, CSS3

FRAMEWORKS

Spring Boot, Django, FastAPI, Node.js, Express.js, React.js, Next.js, Redux

DATA & MESSAGING

MySQL, PostgreSQL, MongoDB, Redis, Apache Kafka, Mongoose, Hibernate, JPA

DEVOPS & TOOLS

Docker, Git, GitHub Actions, CI/CD, Postman, Linux, OpenCV, Pandas, Maven

EDUCATION

B.Tech.

Kanpur Institute of Technology
Kanpur, UP | 2019 - 2023

CERTIFICATIONS

GeeksforGeeks MERN Stack Certification
Coding Ninjas DBMS Certification
Coding Ninjas DSA Certification
IIT Kanpur Prutor Cyber Security Certification

PROFILE SUMMARY

Versatile Software Development Engineer with extensive experience building secure, scalable full-stack web applications and microservice architectures across multiple technology stacks (MERN, Java Full Stack, Python Full Stack). Expert in system design, API development, and database engineering. Proven success in re-architecting monolithic services into containerized microservices, building real-time telemetry pipelines via WebSockets, and optimizing transaction-heavy ledger platforms. Led development teams and streamlined DevOps workflows using Docker and CI/CD.

EXPERIENCE

Software Development Engineer

- CSC e-Governance Services India Ltd. (MeitY, Government of India)

Ministry of Electronics & Information Technology, Govt. of India

12/2023 – PRESENT | New Delhi, India

- Re-architected monolithic backend services to distributed microservices using **Spring Boot**, **FastAPI**, and **Node.js**, improving performance for **20 lakh+ users**.
- Architected transactional endpoints for AEPS, MATM, and UPI platforms, managing **5 lakh+ daily transactions** with an **~80% success rate**.
- Secured backend APIs utilizing **JWT Authentication** and **RBAC**, integrating device binding, rate limiting, and OTP security features.
- Designed and optimized databases using **MySQL**, **PostgreSQL**, and **MongoDB**, utilizing sharding, indexing, and query tuning.
- Established asynchronous task processing and event-driven communication using **Kafka**, **Celery**, and **Redis** cache.
- Integrated telemetry tracking and transaction monitoring dashboards using **React.js**, **Redux Toolkit**, and **WebSockets**.

Freelance Software Engineer

- Workforce Telemetry & Operations

Real-Time Telemetry & Geofencing Platform

06/2023 – 11/2023 | Remote, India

- Designed and developed a real-time workforce telemetry and geofencing system using a **React** frontend and a **FastAPI / Node.js** backend.
- Built an interactive live tracking dashboard in **React** using Ant Design (antd) to display coordinates, speed, and alerts via WebSockets.
- Developed an asynchronous location ingestion pipeline utilizing **FastAPI**, **Celery**, and **Redis** to capture GPS coordinates.

SELECTED PROJECTS

MERN FinTech & E-commerce Platform

A collection of full-stack web applications featuring secure user authentication, interactive dashboards, and REST APIs built with React, Node, Express, and MongoDB.

STACK: React.js / Node.js / Express.js / MongoDB / JWT / Redux

Facial Recognition Attendance System

Engineered an automated student attendance tracking application integrating Python face detection algorithms (OpenCV/LBPH) with MySQL database.

STACK: Python / OpenCV / Tkinter / MySQL / Pandas

Himalayan Edges Website Development

Created an e-commerce platform using React.js and Django with PWA capabilities, hosted on AWS, increasing page speed by 30%.

STACK: React.js / Django / SQLite / AWS / PWA

Traveling Portal & Landing Page

A fully responsive, modern front-end landing page for a travel agency designed with HTML, CSS, and Bootstrap layouts.

STACK: HTML5 / CSS3 / JavaScript / Bootstrap

Persistent Task Management Dashboard

Programmed a desktop utility for task planning, category filtering, and JSON data persistence, featuring clean MVC architecture patterns.

STACK: Python / Tkinter / JSON / MVC Patterns

Real-Time Telemetry Geofencing Engine

Built a real-time workforce geolocation tracking engine with asynchronous GPS coordinate logs, map visualizations, and alerts via WebSockets.

STACK: React.js / FastAPI / Celery / Redis / PostgreSQL

ACHIEVEMENTS

- Graduated with First Class Honors, maintaining top academic rank.
- Earned a 4-Star Gold Badge in SQL on HackerRank.
