CORE SKILLS

CORE JAVA & SPRING

Java, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring Cloud, microservices

APIS, SECURITY & UI

RESTful APIs, OpenAPI/Swagger, JWT, RBAC, device binding, rate limiting, idempotency keys, API versioning, React.js

DATA & MESSAGING

MySQL, PostgreSQL, transaction boundaries, covering indexes, query tuning, Redis, Apache Kafka, dead-letter topics

TESTING & DEVOPS

JUnit 5, Mockito, Testcontainers, Maven, Gradle, Docker, Kubernetes, GitHub Actions CI/CD, Actuator, Prometheus, Grafana

EDUCATION

B.Tech.

Kanpur Institute of Technology
Kanpur, UP | 2019 - 2023

CERTIFICATIONS

Database Systems & SQL Certification
Data Structures & Algorithms Certification
IIT Kanpur Cyber Security Certification
Advanced MERN Stack Developer Certification

PROFILE SUMMARY

Over 10 billion INR settled daily across wallet and ledger services built on Spring Boot, Spring Data JPA and Hibernate. Held AEPS, MATM and VATM orchestration at a 99% success rate over 500,000+ daily transactions by making the payment path idempotent and self-reconciling, and cut p95 database latency 45% through covering indexes and Redis caching. Strong on the unglamorous parts — transaction boundaries, Kafka messaging, JUnit coverage.

EXPERIENCE

Software Development Engineer - CSC e-Governance Services India Ltd. (MeitY, Government of India)

Ministry of Electronics & Information Technology, Govt. of India

12/2023 – PRESENT | New Delhi, India

- Held AEPS, MATM and VATM orchestration at a **99% success rate** across **500,000+ daily transactions**, by making the **Spring Boot** payment path idempotent with request keys, backoff retries and automated end-of-day reconciliation.
- Settled over **10 billion INR** a day with balances that reconcile, by building the wallet and ledger services on **Spring Data JPA** and **Hibernate** with explicit transaction boundaries and optimistic locking.
- Cut p95 read/write latency **45%** across **MySQL** and **PostgreSQL**, by adding covering indexes, tuning the JPA fetch strategy to kill N+1 queries and caching hot lookups in **Redis**.
- Contained a bad release to one service instead of the whole portal for **2 million+ users**, by splitting monolithic e-governance systems into **Spring Boot** microservices behind a versioned REST gateway.
- Blocked **99.9%** of unauthorized access attempts, by adding **Spring Security** with **JWT**, method-level **RBAC**, device binding and OTP retry limits.
- Lifted async throughput **35%**, by moving inter-service calls onto **Apache Kafka** with dead-letter topics, and surfacing consumer lag in **Prometheus** and **Grafana**.

Software Engineer (Contract)

- Independent Client Engagement

Real-Time Telemetry & Geofencing Platform

06/2023 – 11/2023 | Remote, India

- Shipped a workforce tracking platform for **1,000+ field agents** end to end on **Java**, **Spring Boot** and **React.js** — schema design through AWS deployment.
- Brought dashboard load time down **30%**, by streaming live coordinates from Spring Boot **WebSocket** endpoints into a **React.js** and **Ant Design** map view instead of polling.
- Enforced Admin, Supervisor and Employee boundaries across **100+ client accounts**, by adding **Spring Security** method-level authorization and **JWT** claims to the operations API.

SELECTED PROJECTS

Enterprise Authentication & Authorization Service

Spring Security service handling user registration, password hashing, JWT issuance and validation, and role-mapped access control across protected REST routes.

STACK: Java / Spring Boot / Spring Security / JWT / Hibernate / MySQL

Himalayan Edges Commerce Platform

PWA-enabled e-commerce platform on Spring Boot REST services with modular controllers and normalized MySQL schemas, load-verified at 500+ concurrent users.

STACK: Java / Spring Boot / Spring Data JPA / MySQL / AWS / PWA

Attendance Management & Reporting Platform

Spring Boot service exposing REST endpoints for student registration, daily attendance logging, and scheduled Excel report generation, cutting manual record-keeping by 70%.

STACK: Java / Spring Boot / Spring Data JPA / MySQL / REST APIs

Wallet & Transaction Ledger Service

Wallet and ledger service built on Spring Data JPA and Hibernate, using managed transaction boundaries and indexed MySQL schemas to keep balances consistent under concurrent settlement.

STACK: Java / Spring Boot / Spring Data JPA / Hibernate / MySQL / Redis

ACHIEVEMENTS

- First Class Honors, B.Tech. — top academic rank in cohort.
