PROFILE

Backend engineer, 3+ years running payment infrastructure that clears 500,000+ transactions a day for 2M+ users. Java/Spring Boot, Kafka, microservices. Wallet and ledger services settle over 10 billion INR daily with balances that reconcile, and AEPS, MATM and VATM orchestration holds a 99% success rate at peak through idempotent request handling and automated reconciliation. Cut p95 database latency 45% with covering indexes and Redis caching.

CORE TECHNOLOGY

Core: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, microservices, REST APIs

Data & Messaging: Apache Kafka, MySQL, PostgreSQL, MongoDB, Redis, transaction boundaries, covering indexes, query tuning

Platform & Delivery: Docker, Kubernetes, GitHub Actions CI/CD, Maven, Gradle, JUnit 5, Mockito, Testcontainers, Prometheus, Grafana

Also: Python, React.js, JavaScript (ES6+), JWT, RBAC, OpenAPI/Swagger, idempotency keys

EXPERIENCE

Software Development Engineer | **CSC e-Governance Services India Ltd. — India's national digital services platform, 2M+ users**

*Ministry of Electronics & Information Technology, Govt. of India
12/2023 – PRESENT | New Delhi, India*

- Held AEPS, MATM and VATM orchestration at a **99% success rate** across **500,000+ daily transactions**, by making the **Spring Boot** payment path idempotent with request keys, backoff retries and automated end-of-day reconciliation.
- Settled over **10 billion INR** a day with balances that reconcile, by building the wallet and ledger services on **Spring Data JPA** and **Hibernate** with explicit transaction boundaries and optimistic locking.
- Cut p95 read/write latency **45%** across **MySQL** and **PostgreSQL**, by adding covering indexes, tuning the JPA fetch strategy to kill N+1 queries and caching hot lookups in **Redis**.
- Contained a bad release to one service instead of the whole portal for **2 million+ users**, by splitting monolithic e-governance systems into **Spring Boot** microservices behind a versioned REST gateway.
- Blocked **99.9%** of unauthorized access attempts, by adding **Spring Security** with **JWT**, method-level **RBAC**, device binding and OTP retry limits.
- Lifted async throughput **35%**, by moving inter-service calls onto **Apache Kafka** with dead-letter topics, and surfacing consumer lag in **Prometheus** and **Grafana**.

Software Engineer | **Contract engagement — field-workforce logistics, 1,000+ agents**

*Real-Time Telemetry & Geofencing Platform
06/2023 – 11/2023 | Remote, India*

- Shipped a workforce tracking platform for **1,000+ field agents** end to end on **Java**, **Spring Boot** and **React.js** — schema design through AWS deployment.
- Brought dashboard load time down **30%**, by streaming live coordinates from Spring Boot **WebSocket** endpoints into a **React.js** and **Ant Design** map view instead of polling.
- Enforced Admin, Supervisor and Employee boundaries across **100+ client accounts**, by adding **Spring Security** method-level authorization and **JWT** claims to the operations API.

SELECTED PROJECTS

Enterprise Authentication & Authorization Service

Java / Spring Boot / Spring Security / JWT / Hibernate / MySQL

Spring Security service handling user registration, password hashing, JWT issuance and validation, and role-mapped access control across protected REST routes.

Himalayan Edges Commerce Platform

Java / Spring Boot / Spring Data JPA / MySQL / AWS / PWA

PWA-enabled e-commerce platform on Spring Boot REST services with modular controllers and normalized MySQL schemas, load-verified at 500+ concurrent users.

Attendance Management & Reporting Platform

Java / Spring Boot / Spring Data JPA / MySQL / REST APIs

Spring Boot service exposing REST endpoints for student registration, daily attendance logging, and scheduled Excel report generation, cutting manual record-keeping by 70%.

Wallet & Transaction Ledger Service

Java / Spring Boot / Spring Data JPA / Hibernate / MySQL / Redis

Wallet and ledger service built on Spring Data JPA and Hibernate, using managed transaction boundaries and indexed MySQL schemas to keep balances consistent under concurrent settlement.

EDUCATION

Bachelor of Technology (B.Tech.) | Kanpur Institute of Technology, Kanpur, UP

2019 - 2023
