STACK: Java / Spring Boot / Spring Data JPA / Hibernate / MySQL / Redis

SUMMARY

Java full stack developer building secure, high-volume enterprise FinTech systems. Core stack is Spring Boot, Spring Security, Spring Data JPA and Hibernate over MySQL and PostgreSQL, with Kafka for anything that shouldn't block a request. Owns wallet and ledger services settling over 10 billion INR a day, and transaction orchestration holding a 99% success rate across 500,000+ daily transactions. Strong on the unglamorous parts — transaction boundaries, indexing, cache tuning.
