CORE SKILLS

LANGUAGES

Java, Python, JavaScript (ES6+),
TypeScript, SQL, C++, HTML5, CSS3

BACKEND & ARCHITECTURE

Spring Boot, Django, FastAPI, Node.js,
Express.js, React.js, Next.js, microservices,
REST APIs, WebSockets

DATA & MESSAGING

MySQL, PostgreSQL, MongoDB, Redis,
Apache Kafka, Celery, Hibernate/JPA,
indexing & query tuning

DEVOPS & OBSERVABILITY

Docker, Git, GitHub Actions, CI/CD, Linux,
Postman, Jira, Prometheus, Grafana

EDUCATION

B.Tech.
Kanpur Institute of Technology
Kanpur, UP | 2019 - 2023

CERTIFICATIONS

Data Structures & Algorithms Certification
Database Systems & SQL Certification
Advanced MERN Stack Developer
Certification
IIT Kanpur Cyber Security Certification

PROFILE SUMMARY

Software engineer building distributed systems for national e-governance and FinTech platforms — microservice architecture, transaction-critical APIs, event-driven pipelines. Currently 2 million+ users and 500,000+ transactions a day across Java/Spring Boot, Python/FastAPI and Node.js services. Hired and onboarded 4 engineers and moved the team onto Docker-based CI/CD. Most useful when a system is either growing faster than its design or falling over under load.

EXPERIENCE

Software Development Engineer - CSC e-Governance Services India Ltd. (MeitY, Government of India)

Ministry of Electronics & Information Technology, Govt. of India

12/2023 – PRESENT | New Delhi, India

- Split monolithic backends into distributed microservices across **Spring Boot**, **FastAPI** and **Node.js**, serving **2 million+ users**.
- Built the transaction-critical endpoints for AEPS, MATM and UPI, sustaining **500,000+ daily transactions**.
- Cut unauthorized access attempts **99.9%** with **JWT**, **RBAC**, device binding and OTP controls.
- Reduced read/write latency **45%** across **MySQL**, **PostgreSQL** and **MongoDB** using sharding, partitioning and query tuning.
- Lifted message throughput **35%** by moving inter-service work onto **Apache Kafka**, **Celery** and **Redis**.
- Stood up **Prometheus** and **Grafana** dashboards and automated container delivery for all **3** payment platforms with **Docker** and **GitHub Actions**.
- Hired and onboarded **4 engineers**, improving team onboarding efficiency **40%**.

Freelance Software Engineer

- Workforce Telemetry & Operations

Real-Time Telemetry & Geofencing Platform

06/2023 – 11/2023 | Remote, India

- Engineered a workforce telemetry platform — **React.js** front end, **FastAPI** backend — for **1,000+ field agents**.
- Processed **10,000+ concurrent** GPS pings at **99.9% uptime** through a **FastAPI**, **Celery** and **Redis** ingestion pipeline.
- Built the live map dashboard in **React.js** with **Ant Design**, **30%** quicker to load.

SELECTED PROJECTS

Transaction Orchestration & Ledger Platform

Microservice platform orchestrating AEPS, MATM, and UPI settlement with a transactional wallet ledger, retry and reconciliation handling, and Kafka event fan-out.

STACK: Spring Boot / FastAPI / Kafka / PostgreSQL / Redis

MERN FinTech & Commerce Suite

Full-stack applications with JWT-secured authentication, role-based admin dashboards, and versioned REST APIs on React, Express, and MongoDB.

STACK: React.js / Node.js / Express.js / MongoDB / JWT / Redux

Real-Time Telemetry & Geofencing Engine

Workforce geolocation engine ingesting asynchronous GPS streams, rendering live map visualizations, and pushing geofence alerts over WebSockets.

STACK: React.js / FastAPI / Celery / Redis / PostgreSQL

Enterprise Authentication & Authorization Service

Reusable auth service providing registration, password hashing, JWT issuance and rotation, and RBAC enforcement across protected REST routes.

STACK: Spring Boot / Spring Security / JWT / MySQL

ACHIEVEMENTS

- Graduated with First Class Honors, maintaining top academic rank.
- Earned a 4-Star Gold Badge in SQL on HackerRank.
